

Report to Debenham P C from former Tree Warden and member of Trees and Greens committee:

Trees in the cemetery have been subject to a long overdue tidy up over the winter months with a special thanks to Jason from GREENMAN for a very good job expertly concluded.

Logs were left for the community to collect and they disappeared pretty quickly !

The trees should be monitored throughout the year for any problems or signs of disease.

Some trees had to have a pollard.... this looks a little drastic but can be good for the regrowth and health of the tree in the long term .

Growth will be slow on some trees but they should all look good again given time.

Trees throughout the village will continue to be maintained in most areas by MSDC ac except those on greens maintained by the P C .

Conservation areas are due for monitoring this year, this is continuous as these areas are very important for wildlife . Any issues should be reported to David Mitchell MSDC Tree officer.

Richard Giffin has again started cutting the green spaces after gaining the continued contract from P C after the excellent job he made of the grass cutting , trimming etc last year .

Just a reminder that all hedge and tree work should not be undertaken from 31st March till July 31st as these are bird nesting months. Please refer to DEFRA for information and confirmation.

Please enjoy the fantastic green areas in Debenham including the lovely display of various trees.

Sadly this will be my final report to council as very soon I am moving from the village because of demands of work .

I would like to wish you all well and hope that everyone will continue to value the lovely trees and greens in Debenham.

Kindest Regards

Carol Hellier
